CRIMINAL CODE / EVIDENCE GENOME ATLAS

01 / FIXED CRIMINAL CODE COORDINATE UNDERLAY

CASE: EMPTY TEMPLATE ID: UNASSIGNED COURT: — REV: V1 DATE:

1,476 registered section anchors | 0 mapped sections | 0 imported source records

The anchors are a section-title index, not a validated taxonomy of Criminal Code offence elements.

CRIMINAL CODE / EVIDENCE GENOME ATLAS

02 / DNA-STYLE EVIDENCE ALIGNMENT

CASE: EMPTY TEMPLATE ID: UNASSIGNED COURT: — REV: V1 DATE:

POLICE

COURT / CROWN / DEFENCE

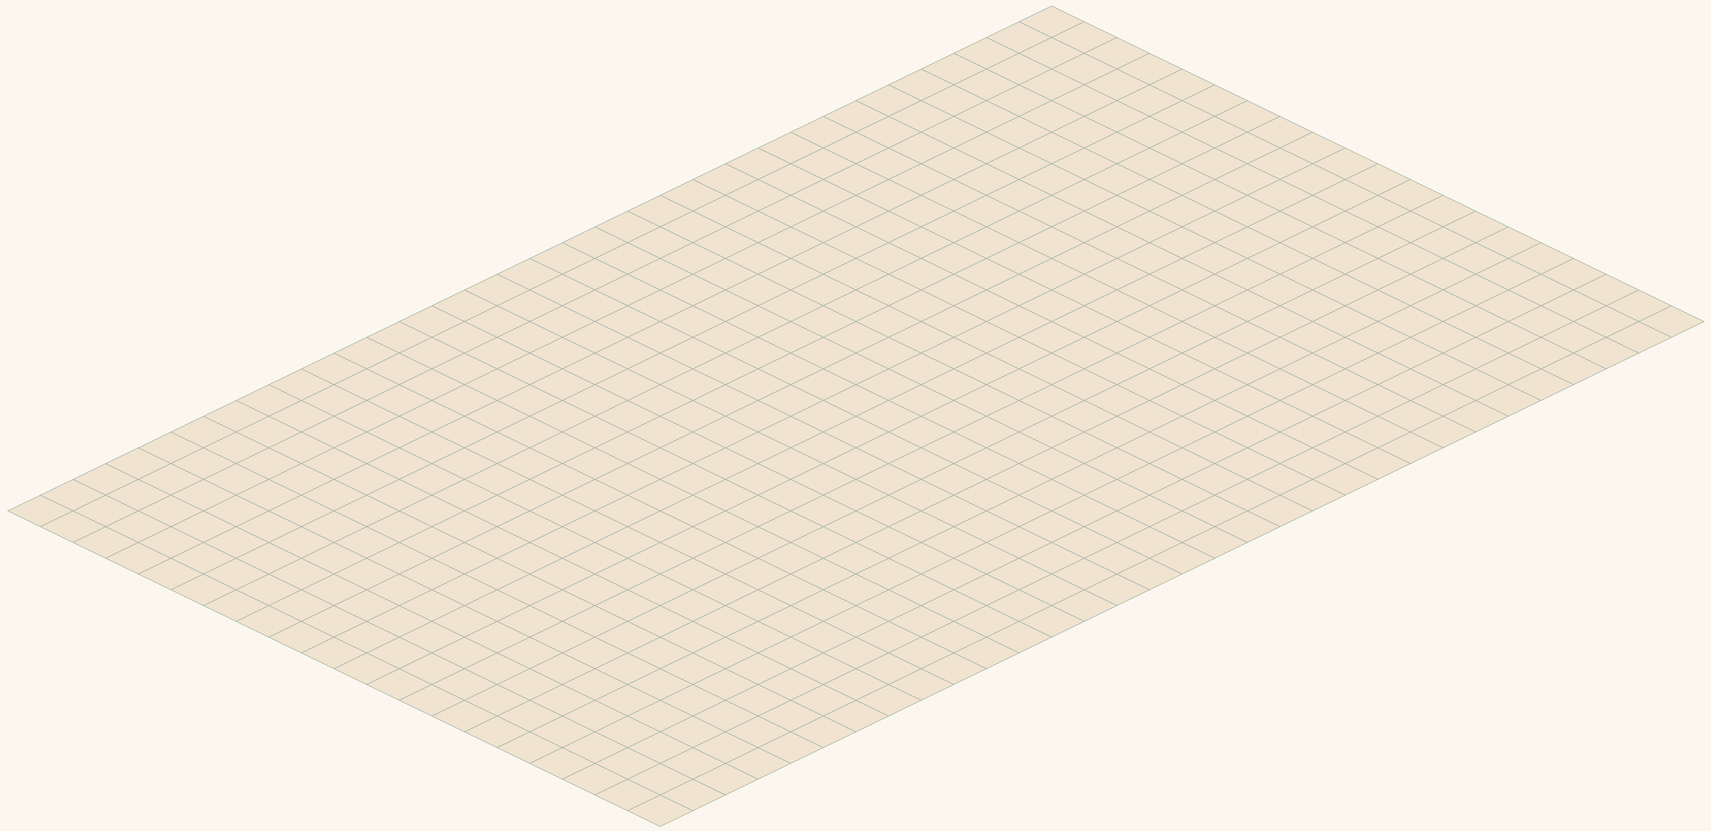

NO EVIDENCE IMPORTED — DNA STRANDS REMAIN UNPOPULATED

Connecting rungs mean shared identifiers, not agreement of factual claims.

CRIMINAL CODE / EVIDENCE GENOME ATLAS

03 / 3D PERSPECTIVE TERRAIN — REGISTERED EVIDENCE DENSITY

CASE: EMPTY TEMPLATE ID: UNASSIGNED COURT: — REV: V1 DATE:

EMPTY CASE DATA — FLAT TERRAIN

Measured elevation: local density of 0 imported records at fixed Code coordinates. No mock data.

Height is a visualization of record volume only; repeated or derivative records are not independent corroboration.

CRIMINAL CODE / EVIDENCE GENOME ATLAS

04 / DIFFERENCES / PRIORITY REVIEW MARKERS

CASE: EMPTY TEMPLATE ID: UNASSIGNED COURT: — REV: V1 DATE:

0 candidate review addresses (not confirmed contradictions)

No rule-based review flags in current data.

The comparison algorithm detects shared addresses, provenance gaps, revisions and explicitly disputed statuses.

It does NOT infer semantic contradictions, factual truth, judicial acceptance or admissibility.

CRIMINAL CODE / EVIDENCE GENOME ATLAS

05 / DATA CONTRACT / LEGEND / TRANSFORMATION

CASE: EMPTY TEMPLATE ID: UNASSIGNED COURT: — REV: V1 DATE:

L0 — Criminal Code	Fixed provision coordinate; statute version; independently verified legal elements.
L1 — Police	section, element, proposition, assertion, source, passage, observed, revision, group, status
L2 — Court side	Same fields; role and status must distinguish submission, evidence and actual judicial finding.
L3 — Comparison	Same section/element/proposition = comparable address, not confirmed agreement.
DNA rung	One legal proposition address; strands represent source roles; colour marks review needs.
Terrain height	Smoothed imported record count per fixed statutory coordinate, never guilt or credibility.
Provenance	Source ID, page or timestamp, optional SHA-256, extraction method and reviewer.
Revision	Keep V1, V2, V3 immutable; do not replace earlier assertions silently.
Missing information	Unpopulated or incomplete positions remain explicitly unmapped.
Legal safeguard	Human reviewer verifies applicable offence elements, source context and court findings.
